

The Next Generation of Image Capture

Smart Workflow | Engineered Reliability | Easy Acquisition

XC is iCRco's most advanced image acquisition application. From the Rad room to the emergency room, from full spine images to mammography screenings, **XC** acquires all images. Engineered for stability and reliability, **XC** makes interoperability with your existing imaging systems a breeze. Effortlessly send images to your PACS system and pull patient demographics from your

electronic health records management systems like RIS, HIS and EMR. Exporting to CD, DVD, or external drives for referring physicians is a simple process letting you work the way you need to. Custom settings for procedure workflows, text annotations, imaging defaults, DICOM settings, and administrative access means **XC** works for any imaging facility.

iCRco provides a full range of digital imaging solutions including cassette workflow, direct capture, and 3DCT. Its globally-recognized products reduce healthcare costs with reliable hardware systems and high-resolution capabilities.

CAPTURE

XC | ACQUISITION

XC touchscreen acquisition with ICE-3 Enhancement Processing is the most advanced image acquisition application. From the Rad room to the emergency room, from full spine images to mammography screenings, **XC** acquires images for all.

REVIEW

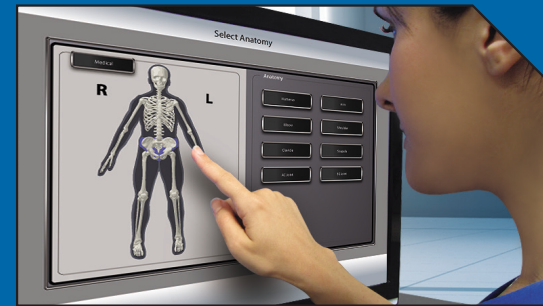

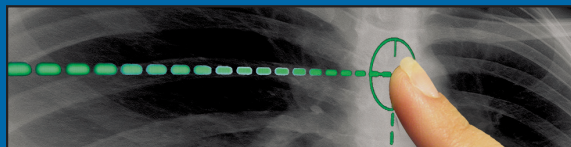

ICLARITY MOBILE VIEWING

Introducing **iClarity** – an advanced application that allows you to securely utilize your PACS software through your phone or pad. Locate the studies you need with iClarity's powerful search facility, which can sort by name, identification number, modality, and date.

The Next Generation of Image Capture

XC™ Features

PROCEDURE-CENTRIC WORKFLOW

Select procedures with corresponding CPT codes, or create a custom procedure to streamline workflow.

MULTI-TASK SCANNING

Manipulate images while additional images are being acquired.

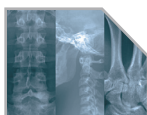

DRAG AND DROP IMAGES BETWEEN STUDIES

Manage and organize images with a simple drag and drop operation.

MULTI-TOUCH GESTURE CONTROLS

Navigate menus and tools using intuitive touch-screen gesture controls

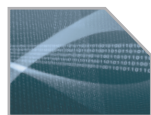

ICE-3 IMAGE ENHANCEMENT™

Processing algorithms are intelligently applied to proper anatomy and view. Standard, soft, or sharp processing is available.

EASY EXPORT

Export studies to an external drive, burn a CD or DVD, or send directly to a printer.

DICOM & HL7 COMPLIANT

Auto-send images to PACS, and integrate with electronic patient management systems like RIS, HIS and EMR.

IMAGING AND ANNOTATION TOOLS

Advanced tools including: Smart Window Level, Crop, Mask, Heart-to-Lung Ratio, Center Line, Cobb Angle, Image Tile-View, and much more.

CUSTOM SETTINGS

Create custom workflow procedures, text annotations, imaging defaults, DICOM settings, and administrative settings.

DATA MANAGEMENT

Monitor disk space and safely purge images with simple sophistication.

CAPTURE FROM MULTIPLE DEVICES

Acquire images from multiple devices via one user interface

PATIENT SCHEDULING & MONITORING

Schedule patients and keep track of your workflow with progress indicators, dynamic search and sort features, and edit able patient information.
